VETNORDIC

Measuring of dog and finding the right size of muzzle:

- Measure the perimeter of the snout of the dog approximately in the position shown at the drawing by using a string or a measuring tape
- Do not tighten it too much; it should be easy to slip a finger between the snout and the string
- Remove measuring tape and read off the measurement or remove the string and use the inside of the insert or a ruler to find the right size of muzzle

NB! Do not choose a tight muzzle - it is important that the dog is able to breath effortless when wearing the muzzle

Measurements in cm		XXXXS	XXXS	XXS	XS	S	M	L	XL	XXL	XXL-Short
		●	●	●	●	●	●	●	●	●	●
